Schrägbilder zeichnen: Würfelgebäude

1. Zeichne die Figuren mit dem Geodreieck oder Lineal ab. Orientiere ich dabei immer an den Kästchen.

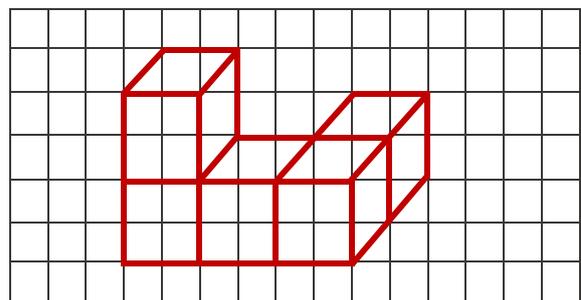

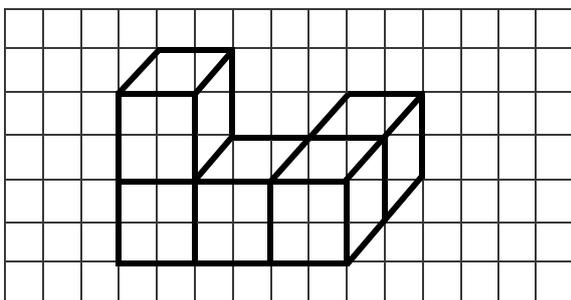

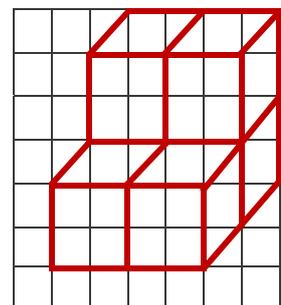

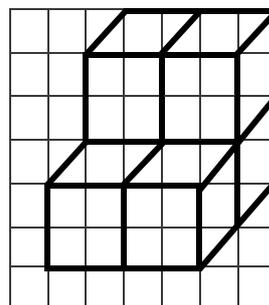

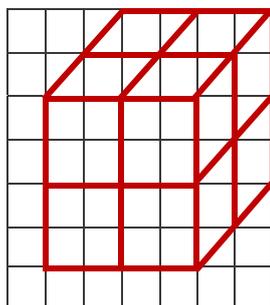

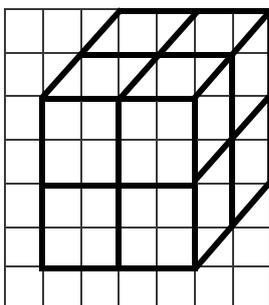

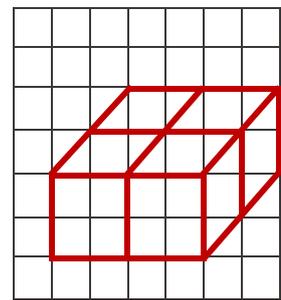

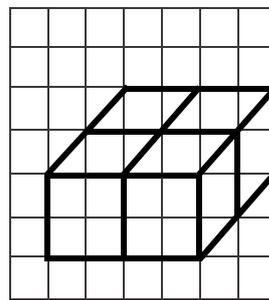

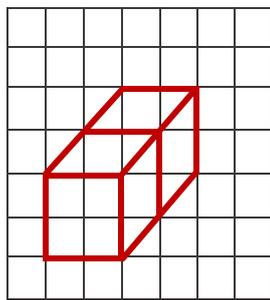

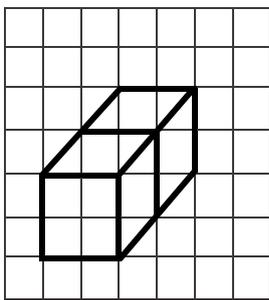

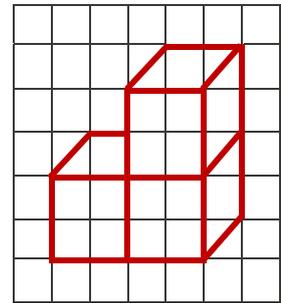

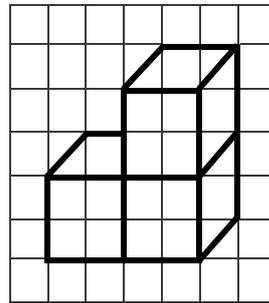

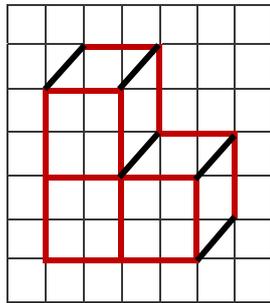

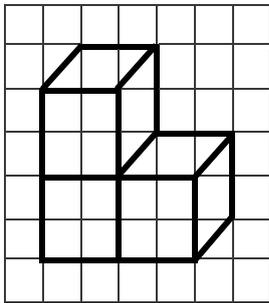

Wuff! Zeichne immer zuerst alle Vierecke, die du vorn siehst. Erst danach zeichnest du die schrägen Linien. So geht es leichter.

Kannst du die Gebäude auch ohne Kästchen zeichnen?

2. Nun werden die Figuren schwieriger. Zeichne sie wieder mit dem Geodreieck oder Lineal ab. Nutze die Kästchen als Orientierung.

Wenn du möchtest, kannst du dir eigene Gebäude ausdenken. Zeichne sie auf kariertem Papier oder auf weißem Papier, wenn du eine Herausforderung brauchts.
